Designed for Comfort

The Trail Rider Ultra from Smooth Stride features a comfort-fit design. Densely-woven Dryline fabric holds its shape and wicks moisture away from the rider. Standard comfort features include built-in cotton/lycra undergarment and no inside leg seams. Available in boot cut or straight leg, full seat or knee patch, black, taupe or winpro polar fleece in winter (shown).

Cool, Man

Supracor's Cool Grip pad for barrel racing saddles features Stimulite honeycomb for shock-absorbing protection. The pad's Total Pressure Management system provides pressure relief, reduced shearing and ventilation to control heat and moisture. The ultra-lightweight pad contours to the horse's back and features a natural lift for clearance over the withers.

Hold the Line

Accent Lunge Lines from Coastal Pet Products offer comfort and control, featuring a soft-grip handle that can be slid up and down the lead for greater control. The rubber grip allows the handler to lunge the horse with minimal effort and less stress on hands. A swivel bolt snap keeps the lead from binding or twisting.

Role Reversal

Brightly colored note cards by Ciao Bella humorously show foxes dressed for the hunt, enjoying a picnic with their horses nearby. Many other equestrian-motif designs are available from the company. Pam Braun is the exclusive artist for the card maker.

Modular Bridle

Each piece of the RP Ultimate Comfort Dressage Bridle is individually sized for a custom fit. The design is modular, allowing owners maximum adjustability and to replace or exchange pieces as their needs change. Designed to alleviate the discomfort that is common in some bridles. From the ReactorPanel Saddle Co.
